

# Jasmine Jiang

## SOFTWARE DEVELOPER

Alexandria, VA | (401)-622-2060 | [jasminemazzarella@gmail.com](mailto:jasminemazzarella@gmail.com) | [LinkedIn](#) | [GitHub](#) | [Medium](#)

Analytical, detail-oriented Full Stack Developer with problem-solving skills. Background in associate management, training, and team collaboration. Experience with frontend and backend technologies including Python, Node, JavaScript, and React. Passionate about aesthetic design and user experience.

### TECHNICAL SKILLS

---

React, Python, SQL, HTML, CSS, JavaScript, digital drawing

### TECHNICAL PROJECTS

---

**ScribbleSpark** | HTML, CSS, React, PostgreSQL, Flask, Python | [GitHub Link](#) | [Demo](#) September 2023

*A full-stack web app where users can create accounts via a username and password, post responses to admin-created writing prompts, and reply to and favorite other users' posts*

- Developed front-end with React, back-end API with Flask and SQLAlchemy, and database with PostgreSQL
- Employed React routing for a fast and responsive user experience
- Implemented input validation via Formik and Yup libraries for account creation, login, and post functions
- Used state variables to vary appearance of website depending on login status and user account type (admin or regular user)

**Cocktail Recipe Finder** | HTML, CSS, JavaScript | [GitHub Link](#) | [Demo](#) April 2023

*Front-end web app that renders search results from an open-source API into cocktail recipe cards*

- Developed one-page app with HTML, CSS, and Javascript
- Implemented fetch requests to return results based on user input (ingredients/cocktail name)
- Styled the results as flippable card graphics via CSS

### EXPERIENCE

---

**Amazon** **Springfield, VA**  
*Assistant Manager (Promotion)* January 2022 - Present

- Proposed and implemented solutions to minimize idle time and boost pick rate
- Allocated up to 100 associates based on need and headcount to balance various roles in the warehouse
- Engaged and coached associates on standard practice and pick rate to maintain metrics goals
- Addressed associates' concerns and potential barriers in their work to build rapport and team culture

*Driver Trainer (Promotion)* September 2020 - January 2022

- Trained three new Driver Trainers while also overseeing launch of a new curriculum; training remained successful and un-disrupted throughout these changes
- Owned creation of written guide to standard process for driver training, detailing all tasks and admin work in proper sequential order
- Revised and edited materials for clarity, which were forwarded to driver trainees and resulted in fewer misunderstandings/missed attendance

*Learning Ambassador* July 2019 - September 2020

- Problem solved packages (damaged, wrong station, undeliverable, etc.) to fulfill customer promise for on-time delivery
- Trained new associates on standard practice to reduce stowing errors

### EDUCATION

---

**Flatiron School** **New York, NY (remote)**  
*Software Development Bootcamp* October 2023
